Foster Care

BUREAU OF FAMILY PROTECTION AND PRESERVATION

FSSA's Bureau of Family Protection and Preservation (BFPP) and the Department of Child Services (DCS) local offices serve children in the state who are at risk of abuse and/or neglect and children and their families where abuse and/or neglect has been substantiated. The BFPP administers programs that provide family services, child abuse prevention services, foster care, adoption, independent living, residential licensing, residential investigations, and other youth services.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include but are not limited to education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

The program carries out these goals by providing four (4) basic services: Service Referral Agreements, Informal Adjustments, Services to a Child in Need of Services (CHINS) and Reunification Services.

- **Service Referral Agreements** – voluntary agreements made by the family case manager, parent(s) and other involved parties when a family admits to a problem, the child is not at serious risk in the home, and no court involvement is sought.
- **Informal Adjustments** – agreements made by the family case manager, the child's parent(s) guardian, custodian, attorney and other involved parties when a family admits to a problem and the child is at minimal risk in the home. The agreement is filed with the juvenile court, must be approved by the court, and may include many of the above-noted services.
- **Services to a Child in Need of Services (CHINS)** – services to children who are victims of child abuse and neglect include case planning, periodic case review and many of the services mentioned above. Services are also provided for the child's family. CHINS cases are directed and monitored by the juvenile court.
- **Reunification Services** – services provided to families when a child who has been removed from the family has a goal to return to the family. Any or all of the above-noted services may be offered. The objective is to reunify children and their families in cases of substantiated reports of child abuse or neglect. However, the safety of the child remains the priority in the decision to reunify.

The state of Indiana has developed a five- (5) year plan for child welfare services with the help of community partners. The five- (5) year plan is funded by several funding streams including Title IVB Part II monies.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include but are not limited to education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

Family preservation expenditures largely reflect the cost of home and community-based services to children and their families who are under the supervision of the local office of family and children, and have been placed in their own homes. However, some of these costs are spent on home and community-based services to families of children who have not yet been returned home. The

BUREAU OF FAMILY PROTECTION AND PRESERVATION

purpose of these services is to prepare the family for the safe return of the child.

Child Welfare expenditures include Foster Care (IV-E), Adoption Assistance, Child Welfare Assistance, Non-Recurring Adoption Expense and Independent Living. Child Welfare expenditures have steadily increased over the last 10 years going from 187 million in 1994 to 345.1 million in 2003.

SFY 2003 Child Welfare Expenditures

Foster Care (IV-E)	44.6
Adoption Assistance	39.9
Child Welfare Assistance	257.3
Non-Recurring Adoption Expense	1.1
<u>Independent Living</u>	<u>2.2</u>
TOTAL	345.1

Child Protection Services (CPS) operates a toll-free hotline (1-800-800-5556) for people to call and report suspected cases of child abuse or neglect on a statewide basis. Although reports can be made in person or by correspondence, the vast majority of child abuse and neglect reports are made by telephone. CPS receives and initiates investigations of abuse reports on a 24-hour basis. Reports that are made via third parties or from people who may not have first knowledge of the conditions or incident must still be evaluated upon the same merits as other reports. Anonymous reports are accepted.

Investigations of abuse and/or neglect may be substantiated or unsubstantiated. The child's safety is the primary factor in all CPS investigations. Families receive services based on an assessment of the child's and the family's needs, and an assessment of the relative safety and risk to the child in the home.

In Indiana, abuse and/or neglect occurs when a child who has not yet attained the age of 18 experiences a condition in which:

1. the child's physical or mental health is seriously impaired or seriously endangered as a result of the inability, refusal or neglect of the child's parent, guardian, or custodian to supply the child with necessary food, clothing, shelter, medical care, education, or supervision (IC 31-34-1-1).
2. the child's physical or mental health is seriously endangered due to injury by the act or omission of the child's parent, guardian, or custodian (IC 31-34-1-2). This section would address inappropriate discipline and an allegation that the illegal manufacture of a drug or controlled substance is occurring on property where a child resides.
3. the child is a victim of one or more of the following sexual offenses (IC 31-34-1-3); Rape (IC 35-42-4-1), Criminal Deviate Conduct (IC 35-42-4-2), Child Molesting (IC 35-42-4-3), Child Exploitation/Child Pornography (IC 35-42-4-4), Child Seduction (IC 35-42-4-7), Sexual Misconduct with a Minor (IC 35-42-4-9), Public Indecency/Indecent Exposure (IC 35-45-4-1), Prostitution (IC 35-45-4-2), or Incest (IC 35-46-1-3).
4. the child's parent, guardian or custodian allows the child to participate in the performance of sexual activity as defined by IC 35-49-2-2 (Matter if Performance Harmful to Minors) or IC

BUREAU OF FAMILY PROTECTION AND PRESERVATION

35-49-3-2 (Obscene Performance).

5. the child's parent, guardian, or custodian allows the child to commit indecent acts or prostitution prohibited by IC 35-45-4.

Children in Need of Services, as defined in IC 31-34-1-6 through 31-34-1-8, are not considered to constitute abuse or neglect but are included as they may result in intervention with the family and child. These categories are:

IC 31-34-1-6 Child substantially endangering own or another's health

IC 31-34-1-7 Parent, guardian, or custodian failing to participate in school disciplinary proceeding

IC 31-34-1-8 Missing child.

IC 31-34-1-9 (Disabled child deprived of necessary nutrition or medical or surgical intervention) specifies that all the CHINS categories include a child with a disability who is deprived of necessary nutrition or medical or surgical intervention generally provided for similarly situated children with or without disabilities.

IC 31-34-1-10 and IC 31-34-1-11 are part of the definition of a child in need of services based on child abuse/neglect as defined in IC 31-9-2-133 concerning a victim of child abuse or neglect.

IC 31-34-1-10 defines a child is a victim of abuse or neglect if the child was born with fetal alcohol syndrome or any amount of a controlled substance or legend drug in the child's body.

IC 31-34-1-11 defines a child as a victim of child abuse or neglect if the child has an injury or any abnormal physical or psychological development or has a substantial risk of a life threatening condition that results from the mother's use of alcohol, controlled substance, or legend drug while pregnant with the child.

Acts and circumstances that are suspected of falling within these parameters of child abuse and/or neglect are subject to the mandatory reporting requirements. The Indiana Child Welfare Information System (ICWIS) assists in the determination by measuring the data entered against Indiana Code (IC) parameters. ICWIS is a tool but does not replace the critical evaluation of a trained, experienced case manager and supervisor.

Institutional Child Protection Services

The Institutional Child Protection Services investigates allegations of child abuse and/or neglect in any institutional or out-of-home care setting. Reports are received at the local office, and investigations of abuse are initiated within 24 hours. This program determines whether the child should remain at the facility or home, whether adequate protection can be provided, whether referrals are needed for follow-up monitoring, and whether referral for prosecution of perpetrators is warranted (substantiated cases).

Facilities could include Child Care Center (licensed and unlicensed/exempt), Child Care Home, Foster Family Home, Group Home, Registered Child Care Ministry, Residential Facility, School, State Institution, Hospital, Other. Perpetrators could include facility staff and other residents.

Child Fatalities

A child fatality review process has been in place since SFY 1999 by Division of Family & Children (DFC) Policy Directive 1-C -006 to improve information gathering and prevention strategies in the

BUREAU OF FAMILY PROTECTION AND PRESERVATION

area of child fatalities due to abuse and neglect. All counties have fatality reviews by policy as an extension of community child protection teams or via a legislatively approved team (IC 12-13-15). An internal state team reviews detailed information regarding each death involving substantiated abuse and neglect and shares aggregated information with community partners to develop prevention strategies. The annual Child Fatality Report is located at <http://www.in.gov/fssa/PDF/2003report.pdf>

Indiana Kid's First Trust Fund

In a prevention effort, the Indiana Kid's First Trust Fund collects revenues from the "Kids First" license plate and distributes the funds through grants to agencies dedicated to preventing child abuse and neglect.

The goal of the Indiana Kid's First Trust Fund is to provide primary and secondary prevention services to Indiana's children to help ensure that they are not abused or neglected. The Kid's First Trust Fund grant recipients work to provide practical solutions that teach good parenting skills, including the importance of nutrition, how to be an active parent and how to discipline without spanking the child. Other programs provide children with encouragement that helps them grow up healthy and break the intergenerational chain of abuse and neglect.

The Kid's First Trust Fund sends contributions from Kids First license plate sales directly to local community programs that prevent the tragedy of child abuse and neglect. Income for the Kid's First Trust Fund comes from "Kids First" plate sales, fee collections (marriage & divorce filing fees), heirloom birth certificate sales, cash donations and interest. In SFY 2003, Kid's First Trust Fund provided 1.4 million in funding for 86 programs. For additional information about the Kid's First Trust Fund, please visit their website at <http://www.in.gov/fssa/children/grant.html>

Indiana's Foster Care Program

Indiana's Foster Care Program provides 24-hour care to children who can no longer safely remain in their homes due to the occurrence or risk of abuse or neglect, or due to their own need for care and treatment for behaviors which constitute a danger to themselves or others.

Children may be placed in an approved relative home, a licensed foster family home, a group home or child-caring institution, or other court-approved facility.

State policy is to place children in the least restrictive, most family-like setting which meets the child's needs. When possible, a child is placed in close proximity to the child's family, particularly when reunification with the family is the case plan goal.

Foster parents and other care providers work to help reunite a child with a biological parent, or care for a child until that child is adopted. Foster parents and child care professionals are involved in case planning and provision of services to the child and the child's family utilizing a team approach with the child's case manager. Local office staff ensure that foster parents receive proper notification concerning case activities of children in their care.

BUREAU OF FAMILY PROTECTION AND PRESERVATION

The number of homes, agencies and facilities continues to increase. The number of foster homes licensed by the Department of Child Services or by child placing agencies is the highest it has ever been at 4,315 in SFY 2003. The decrease in homes in 1998 to 2,625 was caused by the great increase in the number of adoptions in 1998 brought about by the Adoption and Safe Families Act (ASFA). A significant number of children were adopted by foster parents who, in some cases, stopped being foster parents and focused solely on being adoptive parents.

Title IV-E Foster Care Program

The Title IV-E Foster Care Program provides federal funds for foster care or residential care per diem payments for children whose families would have been eligible for Temporary Assistance for Needy Families (TANF) using the 1996 standards.

By claiming federal IV-E reimbursement local offices can maximize the financial resources available to serve children and families in their communities. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance.

IV-E Waiver Program

In July 1997, the federal Department of Health and Human Services approved Indiana's application for a Child Welfare Demonstration Project, also known as the IV-E Waiver Project. The waiver redesigns the current federal reimbursement system for funding children's services. It emphasizes a more aggressive development of a family focused, community based service delivery system for children in care. The goal of the waiver is to stimulate the growth of community based children's services, thereby shifting significant costs from out-of-home care to services to children and families in their own homes. Each child in the project must have a plan for services approved by the local judge with juvenile jurisdiction.

The project was implemented in a phased approach covering all 92 counties over the course of calendar year 1998. The demonstration project was scheduled to conclude in December 2003. However, an extension for the waiver project was granted. The project will be the subject of a third party evaluation as to its effectiveness in improving family functioning, reducing child abuse and neglect, and expediting more permanent placements for children in a family setting through family reunification, adoption, guardianship, or independent living.

Indiana was the seventh state to have been approved for the IV-E Waiver Project and the only one whose waiver program is statewide. Indiana's project was the largest in scope and involved the use of foster care funds in a more flexible approach to meet the needs of children and their families. Interagency agreements for the waiver are in place in each of the 92 counties between the local judge, probation officers and the local office Director. The waiver applies to 4000 children at any given time and does not require that the children be removed from the homes in order to access federal funds.

IV-E Reimbursement

The claiming of federal IV-E reimbursement is a high priority for the Department. By claiming effectively, local offices can maximize the financial resources available to serve children and families in their local communities. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible costs.

For a child to be eligible, he or she must be under age 18 and must meet 1996 AFDC eligibility requirements at the time of removal. In addition, there must be a judicial finding in the child's case

BUREAU OF FAMILY PROTECTION AND PRESERVATION

that it was contrary to the child's welfare to remain at home and that the state provided services to prevent the child's removal from home, or that reasonable efforts to return the child home were not required. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible costs.

A facility is eligible if it houses no more than twenty-five children. In addition, the facility must be licensed by the state, and must not be primarily for detention purposes. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance.

Adoption Program

Indiana's Adoption Program serves children who are legally available for adoptive placement and who need a permanent family. The State Adoption Program includes recruitment activities and services to the prospective adoptive family, as well as financial support and services to the family receiving the child.

The objective of Indiana's Adoption Program is to find permanence with a family for all Indiana children who are legally available for adoption. Finalized adoptions have steadily increased since 1996. 2002 was the first time in 5 years that the number of adoptions decreased. The decline reflects stabilization in the system after a period of growth spurred by the implementation of the federal Adoption and Safe Families Act in 1997, which is intended to promote permanency planning.

Many of the children in the state system are considered special needs children – children over two years of age, member of a sibling group, or with a mental, physical and/or emotional challenge – who can be more difficult to place. To accommodate the needs of these children, the Special Needs Adoption Program (SNAP) was implemented in 1990 to recruit and support adoptive families for this special population.

Special Needs Adoption Program

The Special Needs Adoption Program (SNAP) implemented in 1990 recruits adoptive families and facilitates the adoptive placement of children with special needs.

The adoption program works in partnership to recruit minority adoptive families, facilitate the adoptive placement of children with special needs and provide the community at large an educational service regarding the needs of adoptive children. Special needs children are usually age 2 or older. Many are of minority background, members of a sibling group that need to be placed together and/or have been diagnosed with developmental, psychological or medical/physical challenges. It is rare that a child involved with DCS for adoption does not have some type of special need.

The Special Needs Adoption Program employs regional adoption casework specialists to recruit adoptive families as well as work with children and families in order to facilitate the adoptive placement of children who have special needs.

Indiana's adoption initiatives have resulted in an increase of finalized adoptions from 464 in 1996 (prior to state funding launching these initiatives) to 1197 in 2000, and 851 in 2003.

BUREAU OF FAMILY PROTECTION AND PRESERVATION

All DFC Children (including SNAP) Finalized Adoptions Calendar Years 1996 - 2003

1996	1997	1998	1999	2000	2001	*2002	*2003
464	592	774	1010	1197	1039	966	851

Figures are based on a **Calendar Year** (January – December) for 1996-2003

This data does **NOT** include private adoptions.

*Source: ICWIS

**1996-2001 reporting was based on numbers self reported by local offices for all children in DFC custody who were adopted. This data may or may not have been entered into ICWIS so cannot be validated in ICWIS. Not all adoption data may have been reported by local offices. Manual self-reporting by the counties was discontinued in 2002 and counties were instructed to enter their adoption data into ICWIS in order to ensure more consistent reporting.

Financial assistance programs available for families who adopt eligible special needs children include:

- **Non-Recurring Adoption Expenses Program** – provides funds to reimburse the adoptive parent for one-time expenses incurred in legally adopting a special needs child.
- **Federal Adoption Assistance Program** – provides financial assistance to families who adopt IV-E eligible children via per diem payments. The child is eligible for Medicaid.
- **County Adoption Subsidy Program** – provides financial assistance to families who adopt children with special needs and demonstrate to the court that per diem and/or medical assistance is needed in order to meet the adopted child's needs.
- **Indiana Adoption Subsidy Program** – provides medical assistance to families who adopt children who have county subsidy maintenance or health subsidy and an existing medical condition.

For more information about Indiana's Adoption Program, visit their website at <http://www.in.gov/fssa/adoption/>.

Indiana Adoption History Program

The Indiana Adoption History Program was established as a result of enabling legislation passed in 1993. The purpose of this program is to assist persons seeking information regarding adoptive situations to which they were a party. The Indiana State Department of Health (ISDH) is responsible for administering the program, but the county offices play a major role in assisting persons to obtain information not available through ISDH. Parties to an adoption may obtain non-identifying information from the county offices without a court order if it is available. However, no identifying information may be released by a county office without obtaining permission from ISDH to do so, since certain signatures must be on file before identifying information can be released.

Interstate Compact on the Placement of Children

The Interstate Compact on the Placement of Children is designed to protect the interests and safety of all children in state custody who are being placed in out-of-home care or for private adoption across state lines and national boundaries. This compact provides a mechanism for the approval of the placement of children into relative, foster, or adoptive homes or into residential facilities and for

BUREAU OF FAMILY PROTECTION AND PRESERVATION

on-going monitoring of the children's progress in these out-of-state placements.

Residential Licensing Sections

The Residential Licensing Sections of the Bureau have licensing authority for a number of facilities and homes. The primary purpose of licensing of foster family homes is to minimize the risk to children in out-of-home care by monitoring and enforcing compliance to minimum health, safety, and program standards as established in 470 IAC 3-1.

Local Offices and licensed child-placing agencies have the responsibility and the authority to assess compliance with these standards and to submit licensing recommendations to the Bureau of Family Protection and Preservation.

Also, the section collaborates with the State Fire Marshal's Office, the State Department of Health, and the office of the State Building Commissioner. These cooperative efforts ensure that minimal standards of fire and building safety and public health protection are maintained for children in child (day) care centers and homes.

The Section also issues licenses to residential child care institutions and group homes. Child caring institutions are agencies which provide 24-hour residential care for dependent, neglected, abused, delinquent, or troubled children who are unattended by a parent, guardian, or custodian. The minimum standards for child institutions servicing 11 or more children are found in 470 IAC 3-11 and 470 IAC 3-12. The minimum standards for group homes (agencies serving ten or fewer children) are found in 470 IAC 3-14 and 470 IAC 3-15. The Bureau also has authority to license private secure facilities. The minimum standards for private secure facilities are found in IAC 470 3-13.

The Department of Child Services in conjunction with state fire inspectors monitors and reviews compliance to these standards at least annually in an effort to maximize the health, safety, and well-being of children placed in these residential treatment programs.

Department staff additionally issues licenses to child-placing agencies. Child-placing agencies are authorized to recruit foster parents and to make foster family home licensing recommendation to the DCS, to complete adoptive home studies, and to place children in either foster homes or adoptive homes. Some child-placing agencies provide only foster care services while others provide both foster care and adoptive services including therapeutic foster care and international adoptions.

Assisted Guardianships

Assisted Guardianship is a possible permanency option for children under the supervision of the Department of Child Services, and is considered when an older child is placed with relatives who promote a permanent, long-term living arrangement that is in the best interest of the child.

This option is available after a court has determined that reunification with the child's parents is no longer feasible, and that adoption is not in the best interest of the child. Both the child and the relatives must meet specific eligibility requirements, and the program calls for a monthly subsidy to be provided based on the need of the child as defined by Temporary Assistance for Needy Families (TANF) guidelines.

Chafee Foster Care Independence Program

Chafee Foster Care Independence Program (CFCIP) provides the state with funding to purchase direct services for youth (ages 14-21) living in foster care who have aged out of foster care. The funding is to be used to help the youth transition to self-sufficiency. Services that can be

BUREAU OF FAMILY PROTECTION AND PRESERVATION

purchased through this program include: education, training and related services; services to prepare for and obtain employment; services to prepare for and enter post secondary training and educational institutions; services to provide personal and emotional support to youth through mentors and the promotion of interactions with dedicated adults. Room and Board types of expenses can be offered to former foster youth (ages 18-21) who were in care on their 18th birthday.

Contracts and Grants

Contracts and Grants are administered through the Bureau, and responsibilities for the ten funding sources are contracted out to private agencies throughout the state for the provision of direct services. The federal funding sources are:

- Chafee
- IVB I & II
- Social Services Block Grant
- Community Based Family Resource and Support Grant

The state funding sources are:

- Project Safe Place
- Youth Service Bureau Fund
- Kid's First Trust Fund (license plate sales and other donations)

These funds are allocated on a competitive basis to agencies providing services in these categories:

- Family Planning, Youth Services, Child Abuse Prevention, Families and Children Services and Independent Living Services

BUREAU OF FAMILY PROTECTION AND PRESERVATION

Policy Changes Effecting the Data Collection Methods

Here is a list identifying some of the changes in the data collected over time. This will be helpful when viewing the Bureau of Family Protection and Preservation data for trend analysis. It may help explain some variances in the data from year to year and facilitate interpretation of the data. Understanding what the data is actually reflecting about program activity is crucial for program development and policy making.

- During 1995 and 1996 the ICWIS was designed and developed by Unisys Corporation.
- In March 1997 the system was implemented in all 92 counties. Each county works from an independent data system. Each night data from all 92 counties is downloaded to a centralized data system in Indianapolis. The reason for the independent nature of the counties data systems is to assure confidentiality of clients.
- Prior to 1996, abuse/neglect reporting was based on a hierarchy of abuse with sexual being the most severe followed by physical and last by neglect. That meant if a child suffered multiple types of abuse/neglect, only the single most severe type was reported. Due to a change in the federal reporting requirement in 1999, ICWIS was required to report all incidences of abuse/neglect so one child could potentially have multiple reports of abuse/neglect. Therefore, comparisons of data before and after 1999 are not feasible.
- There are two types of duplications possible in abuse/ neglect data. One is where the report of abuse/neglect can indicate more than one type of abuse/neglect, i.e. sexual abuse, physical abuse or some combination with neglect where the child is counted once for each type of abuse/neglect in the report. The other is where there is more than one report of abuse/neglect for a child in the year and the child is counted for each report, but only counted once under one category of abuse/neglect for each report.
- The counties during 1997-1999 did manual reporting as they transitioned into ICWIS. In 2000, an influx of transitional information was entered into the data reporting system. A policy directive mandated all child welfare workers to enter all their cases into ICWIS. This involved a massive effort of entering cases opened in previous years but not entered. So old cases, intakes and investigations from 1997-1999 were entered into the system and reflected in 2001 data resulting in higher numbers reported for 2000-01.
- The indicated category was included in the abuse/neglect reporting from 1993 – 1995. Indicated was used when child abuse and/or neglect reports were made and there was not enough evidence to substantiate or unsubstantiated the report but there was a reason to suspect the child may have been maltreated or was at risk for abuse and/or neglect. Indicated was included in the reporting of substantiated abuse cases from 1993 – 1995. The status indicated was discontinued in 1995, and only substantiated cases are counted subsequently. The inclusion of indicated cases with substantiated cases from 1993 –1995 appears to have resulted in higher numbers of abuse being reported compared to subsequent years.
- Per HEA 1194-2003, effective 7-1-04 indicated status will again be reported.
- Abuse/Neglect data on unsubstantiated investigations from 1997 – 2000 was expunged after six months and aggregate numbers were not retained for these investigations for

BUREAU OF FAMILY PROTECTION AND PRESERVATION

the years 1997 - 2000. This practice resulted in lower numbers being reported for unsubstantiated investigations for this period of time. Since 2000, aggregate data for unsubstantiated investigations has been collected and reported.

- ICWIS utilizes a point in time reporting format. Report is a snapshot of what is known on the last day of the month. Over the course of the year the user makes updates and modifications to the data so if pulled again it reflects differently. A point in time average for a specified period of time can be calculated using the count of children at the end of each month divided by the number of months specified.
- Data within ICWIS is dynamic which means data changes day by day according to new data entries from the field. Thus reports from ICWIS have the potential for showing different data from the same report if pulled after an update to the Central Database or individual counties databases.
- Adoption data in ICWIS for 1990-2001 was based on numbers self reported by local offices for all children in DFC custody who were adopted. Since this adoption reporting was done manually, the reliability of the data can not be verified. ICWIS data does NOT include private adoptions. In 2002, a policy decision was made to discontinue use of manual reporting for adoptions, and rely solely on data entered into ICWIS for adoption counts.
- Prior to 10/15/04, institutional investigations were counted in Central Office. Beginning 10/15/03, institutional investigations are counted in the county in which they occur.

Total	23	63	11	2	3,017	32	6,431	297	328	49	4	0	45	18	10,320

Note: H= Hispanic and N-H= Non Hispanic

Note: The Federal definition of race is used with Hispanic separated as an ethnic origin for all races.

**Total Number of Children Reported As Victims of Abuse
and/ or Neglect
State Fiscal Years 1993 to 2003**

From February 1997 through 2000 aggregate numbers were not kept for unsubstantiated investigations.

Institutional Investigations have been included since 1999.

A child is counted in only one category per investigation using the old Federal hierarchy of Sexual Abuse, Physical Abuse, then Neglect.

Abuse numbers include Physical Abuse and Sexual Abuse.

From 1993 to 1995 totals include "Indicated".

Number of Children Reported as Victims of Abuse State Fiscal Years 1993 to 2003

From February 1997 through 2000 aggregate numbers were not kept for unsubstantiated investigations.

Institutional Investigations have been included since 1999.

A child is counted in only one category per investigation using the old Federal hierarchy of Sexual Abuse, Physical Abuse, then Neglect. Abuse numbers include Physical Abuse and Sexual Abuse.

Indicated was discontinued in 1995.

Number of Children Reported as Victims of Neglect State Fiscal Years 1993 to 2003

From February 1997 through 2000 aggregate numbers were not kept for unsubstantiated investigations.

Institutional Investigations have been included since 1999.

A child is counted in only one category per investigation using the old Federal hierarchy of Sexual Abuse, Physical Abuse, then Neglect.

Indicated was discontinued in 1995.

**Number of Child Victims of Sexual Abuse
(Substantiated Investigations)
State Fiscal Years 1993 to 2003**

Numbers for 1993 through 1995 include Indicated Investigations.

Institutional Child Abuse and Neglect Reports State Fiscal Years 1996 to 2003

Data from 1996 to 1998 used Federal hierarchy. Each Investigation is counted in only one category per investigation.

From 1997 to 2000, unsubstantiated cases were expunged and no aggregate data was kept.

Data from 1999 to 2003 the same investigation may be counted in each category. So a case with Physical and Sexual Abuse may be counted twice in the abuse total.
